Possible Risk associated with operating a 10-12 Passenger Van:

- 1. 12-passenger vans have an increased risk of rollover.
- 2. The risk of rollover increases dramatically as the number of passengers is increased from less than five to more than ten. Vans should be loaded by filling the front seats first.
- 3. The weight of the van, particularly when fully occupied, causes the center of gravity to shift to the rear and upward increasing the likelihood of rollover.
- 4. The shift in the center of gravity will also increase the potential for loss of control in panic maneuvers.
- 5. The weight of a fully occupied van requires additional stopping distance.
- 6. The width of the van allows for less lane room.
- 7. The length of the van increases distances needed for making turns, changing lanes, and backing.

I have read and understand the possible risk involved while operating a 10-12 passenger van (Initial)	
I am aware the handling characteristics of a 10-12 passenger van may change dramatically, especially when fully loaded. I understand that extra caution is required when operating this vehicle (Initial)	
I understand that seatbelt use is mandatory for the driver and passengers at all times (Initial)
